Profile Summary

Eager learner with a passion for technology, recently transitioned into software development after completing a 3-month and 4-month intensive bootcamp. I'm a highly motivated individual with a strong foundation in web development technologies like React.js, TypeScript and Next.js and backend development with Python and Django. My skills also include version control with Git and database management with MySQL and SQLite. I love the challenge of solving complex problems with creative solutions. I'm actively seeking an entry-level software developer role to leverage my skills and contribute to a dynamic team.
